

Crystal Palace Park Main Axis Analysis

Before thinking about how to regenerate the main axis of Crystal Palace Park we need to analyse the area as it is now. We would like you to look closely at all the elements of the walkway and write your analysis at the appropriate place on the map. It will help your analysis if you think about the following for each element:

- What is it? E.g. building, floor surface, seat, sculpture etc
- Do I like or dislike it? Why?
- What material(s) is it made of?
- How does it look?
- How does it feel?
- What shapes are there?
- What colour(s) is it?
- Is it well kept or is it broken/dirty?
- Does it need improving?
- Would you keep it in a regeneration plan?
- How does it fit with the rest of the park?
- How do you feel in that place? Happy, sad, comfortable, uncomfortable, safe, unsafe?
